

Is your air conditioner and refrigeration's condensate pan growing something that's not too cool?

**CDC Anti-Clog #1 Units** can help.

A large, dynamic splash of clear water is the central focus, with numerous droplets and a crown-like shape. Below the splash, a microscopic view of green, rod-shaped bacteria is visible, suggesting the growth of Legionnaires' disease bacteria in water.

**Control of Legionnaires' Disease Bacteria  
in preliminary laboratory tests.**

# Used regularly, **CDC Anti-Clog #1 Units** are the ideal antidote for unwanted slime and bacteria growth

Where there's cooling equipment, there's often trouble. Why? Air conditioner and refrigeration drain pans are breeding grounds for slime, sludge and toxic bacteria, all of which may cause major health and maintenance problems.

What if you could eradicate these problems month after month - easily and efficiently? You can...with **CDC Anti-Clog #1 Units**, a drain maintenance product that's so effective, it's registered by the Environmental Protection Agency and NFS International.

## **As powerful as it is compact, CDC Anti-Clog #1 Units eliminate:**

- Clogging and drain pan overflows caused by slime build-up
- Musty odors caused by bacteria-slime accumulation

## **Additional Benefits:**

- Safe, self-contained, tamper-proof packaging
- Mix and match units fit any size equipment
- EPA and NSF International registered
- Created over 30 years ago by CDC, a leader in the field
- Each unit stays effective for a full three months
- Unique design will not clog drain pan

## **CDC Anti-Clog #1 Units: Superior Chemical Formulation**

**CDC Anti-Clog #1 Units** control the growth of slime-forming bacteria, leading to a safer environment. Our new and improved chemical formulation is:

- Registered by EPA and NFS International
- 40% high-efficiency biocides (by weight)
- pH neutralized to help prevent pan corrosion
- Effective in all climates for three months, 24 hours a day
- Initial placement shocks water, then biocide is time-released

## **Who Should Use CDC Anti-Clog #1 Units**

If you use air conditioning or refrigeration units, you need

**CDC Anti-Clog #1 Units**. Our clients include:

- Apartment Buildings
- Commercial / Industrial buildings
- Cruise ships
- Health clubs
- Hospitals
- Hotels and motels
- Nursing homes
- Office buildings
- Schools and universities
- Supermarkets

## Where CDC Anti-Clog #1 Units work best

Display Cases

Beverage & Grocery Reach-In Coolers

Refrigerated Vending Machines

Cool and Cold Storage Walk-Ins

Roof-Top Units

Ceiling Units

Fan Coil Units

### Why You Need CDC Anti-Clog #1 Units

Have you seen your drain pan lately? It may be filled with slime, gunk and disease-causing bacteria. Where does all this stuff come from? Why is the drain pan a catch-all for so many dangerous things? Here's what happens:

**1. Condensation:** Cooling equipment creates cold air by passing warm air over cooling coils. This process causes condensation or water droplets, to form and drip off the cooling coils – much like the droplets that form on the glass of an icy drink on a hot day.

**2. Drainage:** In large, commercial cooling equipment, it's unlawful for condensates to drip out onto passersby and other objects. Therefore, a drain pan is used inside the unit to collect the moisture. Eventually, the condensate flows into a drain hole – and this is where potential trouble begins.

**3. Bacteria:** Bacteria, naturally present in water, produce “slime” as a waste product. This slime can clog the drain port, causing the drain pan to overflow and possibly result in flood damage. It also becomes an ideal breeding ground for harmful bacteria.

**4. Petri-dish Effect:** Warm, standing water in the drain pan can work like a giant Petri-dish – cultivating bacteria and other potentially dangerous microorganisms; the equipment's fan then blows these microbes back into the building, degrading air quality and causing potential health problems.

### CDC Anti-Clog #1 Units: Safe, Functional Design

**CDC Anti-Clog #1 Units** are safe, stable and easy to handle. You never have to touch dangerous chemicals and—unlike other products – it doesn't leave a slimy, waxy residue on fingers.

- Sealed, tamper-proof housing prevents skin contact with biocide
- Filter pad controls biocide for consistent, perfectly timed chemical release over three months
- Weighted, so pieces stay in position, never float away
- Does not clog drain ports
- Can be placed vertically or horizontally
- Low profile – fits most cooling equipment
- Has been proven to control the growth of, or inactivate, Legionnaires' Disease Bacteria in experimental laboratory conditions for (2) months when approximately 15 gallons of water flow over **CDC Anti-Clog #1 Units** per day

## CDC Anti-Clog #1 Units are a Snap to Install

Simply place **CDC Anti-Clog #1 Units** under cooling coils in the middle of the pan length. That's all you do! The product begins working immediately upon contact with water.

Unit(s) here**

## CDC Anti-Clog #1 Units Come In Four Convenient Sizes

**CDC Anti-Clog #1 Units** come in four easy-to-use sizes that can be mixed and matched for optimum effectiveness. Just place one or more in the drain pan and each application starts working immediately and continuously – 24 hours a day for three months. Have equipment over 45 tons? Simply combine the units for the protection you need. For example: If you have a 60-ton unit, use the Brick and the AT/C. For a 90-ton unit, use two bricks. It's that easy! Sizes are as follows:

### Slim Strip

6 1/2" L x 1 1/2" W x 5/16" H

- For equipment up to 5 tons
- Fits easily into condensate pans with low profiles

### FT/C

2 3/4" L x 2 1/4" W x 1/2" H

- For equipment up to 5 tons
- Our most popular size, perfect for higher-profile condensate pans

### AT/C

3 5/8" L x 2 3/4" W x 7/8" H

- For equipment up to 15 tons

### The Brick

8 1/8" L x 2 13/16" W x 1 1/4" H

- For equipment up to 45 tons

For cost-saving preventative maintenance, you can't beat **CDC Anti-Clog #1 Units**. It's easy, inexpensive, efficient and EPA registered. For more information or to place an order, visit our website today at: [www.anti-clog1.com](http://www.anti-clog1.com), or call us at 800-636-7363.
